P.T.O.

**SECTION – C**  
**(Compulsory)**

**(15×1=15)**

10. A hospital, more than any other institution is exposed to emergencies and life threatening situations from medical emergencies like cardiac arrest, accidents, casualties and disasters to dangers arising from fire and bomb threat. In hospitals large number of helpless people concentrated in one place and are so utterly dependent on other people for their safety and health. Built-in safety and preparedness are the essence of all safety programmes. The alarm system is one such program.

According to you which alarms that a hospital should have ? Give reasons.
